Ratings Definitions

Standby:	Prime (Unlimited Running Time):
Applicable for supplying emergency power for the duration of normal power interruption. No sustained overload capability is available for this rating. This rating is applicable to installations served by a reliable normal utility source. This rating is only applicable to variable loads with an average load factor of 80 percent of the standby rating for a maximum of 200 hours of operation per year and a maximum of 25 hours per year at 100% of its standby rating. The standby rating is only applicable to emergency and standby applications where the generator set serves as the back up to the normal utility source. No sustained utility parallel operation is permitted with this rating. (Equivalent to Fuel Stop Power in accordance with ISO3046, AS2789, DIN6271 and BS5514). Nominally Rated.	Applicable for supplying power in lieu of commercially purchased power. Prime power is the maximum power available at a variable load for an unlimited number of hours. A 10% overload capability is available for limited time. (Equivalent to Prime Power in accordance with ISO8528 and Overload Power in accordance with ISO3046, AS2789, DIN6271, and BS5514). This rating is not applicable to all generator set models.

Alternator D	Data							
Voltage	Connection ¹	Temp Rise Degrees C	Duty ²	Single Phase Factor ³	Max Surge kVA⁴	Winding No.	Alternator Data Sheet	Feature Code
380 -415V	WYE	163/125	S/P	N/A		311		B681
380-440V	WYE	125/105	S/P	N/A		311		B726

Notes:

- Limited single phase capability is available from some three phase rated configurations. To obtain single phase rating, multipy the three phase kW rating by the Single Phase Factor³. All single phase ratings are at unity power factor.
- 2. Standby (S), Prime (P) and (C) Continuous ratings.
- 3. Factor for the Single Phase Output from Three Phase Alternator formula listed below
- 4. Maximum rated starting kVA that results in a minimum of 90% of rated sustained voltage during starting.

Formulas for calculating full load currents:

Three Phase Output	Single Phase Output
kWx1000	kWxSinglePhaseFactorx1000
Voltagex1.73x0.8	Voltage
