Rental Power
500 kW

Description
This Cummins Power Generation rental package is a fully integrated mobile power generation system, providing optimum performance, reliability, and versatility for standby and prime power applications. The package utilizes custom designed switchgear to meet severe customer requirements. This switchgear provides reconnectable voltage via a link board design, automatic start/stop control and easy connection to existing installations.

Features
Cummins diesel engines
• Rugged 4-cycle industrial diesel delivers reliable power and fast response to load changes.
• Lightweight, compact, and excellent fuel economy.
• Equipped with heavy duty air cleaners, bypass-type oil filters, and dual-element fuel/water separation filtration system with 4-way valve.
• Includes jacket water heaters for more reliable operation in emergency standby applications.

Control system
• The most advanced, reliable, and capable generator set control system available in the market today.
• Integrated generator set governing, voltage regulation, protection, in one easy-to-operate customer interface.
• Remote monitoring and operation ready.
• Integrated ground fault indication.

Newage alternators
• Designed and built by Cummins Generator Technologies.
• Voltage reconnectable - 480/277 VAC high Wye to 208/120 VAC low Wye standard, 600 VAC optional.
• Alternators designed for improved motor starting.
• Permanent magnet excitation for improved performance in cyclic and non-linear load applications.

Rental package enclosure
• Designed for serviceability access.
• Optimized fuel capacity.
• Fluid containment design for greater environmental protection.
• Sound attenuated to minimize impact on local environment.
• Vertical cooling air and engine exhaust path to minimize sound level adjacent to the container.
• Equipped with 24 VDC lighting.
• Unit has paralleling capabilities at 480 and 600 VAC only.
• Utility grade breaker.
• Shore power 100 amp service breaker panel – single phase 120/240 VAC: (2) 30 amp breakers (one for each coolant heater) – 240 VAC: (26.75 amp = 6420 watts for the heater). (1) 15 amp breaker – 120 VAC (GFIs), (1) 15 amp breaker – 120 VAC (battery charger).

Options
Cold weather package (includes):
• Additional diesel fired block heater
• Battery heating pad
• Floor insulation
• Actuated louver control
• Transport Canada UN31A certified fuel tank

**Site derating factors**

Genset may be operated up to 640 m (2100 ft) and 50°C (122°F) without power deration. For sustained operation above these conditions up to 1150 m (3770 ft), derate by 3.8% per 305 m (1000 ft), and 6.1% per 10°C (3.4% per 10°F). Above 1150 m (3770 ft) up to 1680 m (5510 ft), derate 6.3% total for 1150 m (3770 ft) plus 1.6% per 305 m (1000 ft) over 1150 m (3770 ft) and 3.8% per 10°C (2.2% per 10°F). Above 1680 m (5510 ft) up to 3000 m (9840 ft), derate 9% total for 1680 m (5510 ft) plus 3.7% per 305 m (1000 ft) and 5.7% per 10°C (3.2% per 10°F). Above 3000 m (9840 ft), derate 24.8% total for 3000 m (9840 ft) plus 1.8% per 305 m (1000 ft) above 3000 m (9840 ft) and 10% per 10°C (5.6% per 10°F).

Control system

**PowerCommand control with AmpSentry™ protection**

- Integrated automatic voltage regulator and engine speed governor
- AmpSentry protection guards the electrical integrity of the alternator and power system from the effects of overcurrent, over/under voltage, under frequency and overload conditions
- Control components designed to withstand the vibration levels typical in generator sets

**Standard Control Description**

- Analog % of current meter (amps)
- Analog AC frequency meter
- Analog AC voltage meter
- Analog % of load meter (kW)
- Cycle cranking control
- Digital display panel
- Emergency stop switch
- Idle mode control
- Menu switch
- Panel backlighting
- Remote starting, 12 volt, 2 wire
- Reset switch
- Run-off-auto switch
- Sealed front panel, gasketed door
- Self diagnostics
- Voltmeter/ammeter phase selector switch

**Standard Performance Data Warnings**

- High coolant Temperature
- High DC voltage
- Low coolant temperature
- Low DC voltage
- Low oil pressure
- Over current
- Overload load shed contacts
- Up to four customer fault inputs
- Weak battery
- Overflow

**Standard protection functions**

- Voltmeter/ammeter phase selector
- Warnings
- High coolant temperature
- High DC voltage
- Low coolant temperature
- Low DC voltage
- Low oil pressure
- Over current
- Overload load shed contacts
- Up to four customer fault inputs
- Weak battery
- Overflow

**Shutdowns**

- Emergency stop
- Fail to crank
- High AC voltage
- High coolant temperature
- Low coolant level
- Low AC voltage
- Low oil pressure
- Overcurrent
- Overspeed
- Short circuit
- Underfrequency

Optional Features Shown
**Ratings definitions**

**Standby:**
Applicable for supplying emergency power for the duration of normal power interruption. No sustained overload capability is available for this rating. (Equivalent to Fuel Stop Power in accordance with ISO3046, AS2789, DIN6271 and BS5514). Nominally rated.

**Prime (unlimited running time):**
Applicable for supplying power in lieu of commercially purchased power. Prime power is the maximum power available at a variable load for an unlimited number of hours. A 10% overload capability is available for limited time. (Equivalent to Prime Power in accordance with ISO8528 and Overload Power in accordance with ISO3046, AS2789, DIN6271, and BS5514). This rating is not applicable to all generator set models.

**Accessories**

- 20 ft. Air Ride Chassis (standard package only) 0410-1378
- 30 ft. air Ride Chassis (cold weather package only) 0410-1379
- Access Ladder* 0410-1371
- Folding Ladder 0410-1362

* One access ladder provided with purchase of unit

**Warranty**
All components and subsystems are covered by an express limited one-year warranty.

**Codes and standards**

- **ISO 9001**: This generator set is designed in facilities certified to ISO 9001 and manufactured in facilities certified to ISO 9001 or ISO 9002.
- **SA**: All low voltage models are CSA certified to product class 4215-01.
- **U.S. EPA**: The Prototype Test Support (PTS) program verifies the performance integrity of the generator set design. Cummins Power Generation products bearing the PTS symbol meet the prototype test requirements of NFPA 110 for Level 1 systems.
- **U.S. EPA**: Engine previously certified to U.S. EPA Nonroad Source Emissions Standards, 40 CFR 89, Tier 2. The engine used in this generator set may be used in mobile applications in accordance with the EPA Transition Program for Equipment Manufacturers (TPEM); this provision has specific limitations (see 40 CFR, 1039.625).
